Guide to Purchasing Compostable Liners

Degradable

Made from plastic with other chemicals added. The plastic breaks apart over time when placed in sunlight and heat. They break into small pieces of plastic in the environment.

Breaks down in: does not break down, only breaks up into smaller pieces.

RED BIN ONLY

Biodegradable

Made from plastic, sometimes made from plants and plastic, with an additive to break down the plastic. It doesn't need oxygen to break down.

Breaks down in: varies, time is not specified. It could take thousands of years.

RED BIN ONLY

Compostable (AS 4736)

Made of natural plant starch ie corn and does not produce any toxic material. These completely break down in a composting system. They meet the Australian Standard for compost AS 4736. Be aware that some products may be labelled as 'compostable', but do not meet the standard. Look for the seedling symbol to be sure.

Breaks down in: about 90 days

MADE FOR FOGO

Compostable bags are the **ONLY** bags accepted in FOGO
MUST HAVE AS 4736 & seedling logo or it's not compostable!
